“ Karon, Deb and Family, Your mom was so wonderful and so very young for her age. She always made us feel very special and our mom loved her very much as we did. She kepted the Perry side together for a very long time and I love her for that. We had some good times when we were all there. Take care, our prayers are with you. I know how hard it is to lose a mom no matter when it is or what the situation is. God be with you and I know your mom is with him, our mom, and our dads now talking over old times.
Love you all Michele and family

“ Not to be a jerk (though, I suppose, it could be argued I come by it naturally), but communist and capitalist governments is a misnomer. Capitalism and communism are economic forms, not governmental structures. Socialism would fall under the same determination in which case, you would then state that Norway and Finland are socialist democracies while China is a capitalist authoritarian state. And Norway (at least) is a relatively successful socialist state so long as the price of oil remains high and they have ready access. While their economy may be more diversified than Saudi Arabia, it is not where it needs to be for fuller development to maintain the lifestyle they have should the price of oil fall dramatically. (Sorry, didn't mean to take a China blog off-topic.)
